Longnecker Properties Inc. – First Quarter 2011 Safety memo

May 25, 2011

Re: Quarterly Safety Review

To: All LPI rigging consultants:

Longnecker Properties Inc would like to take a moment to update all of you on our safety record and upcoming work and events happening this year.

Congratulations, we just completed a whole year without a lost time accident (LTA) or a recordable incident. The dedication to safe work practices by all of you has not gone unnoticed and is appreciated. We have had one first aid case (strained muscle) in the first quarter of 2011 and would like to remind you to use proper lifting techniques and get help when needed.

LPI would like for all of our lead riggers, banksmen, and crane operators to check in with the office and update all of their paperwork and forms. We have some new stop work cards and behavior observation sheets. The drilling activity in the Gulf of Mexico is slowly coming back around and we are currently adding a lot of new projects so if any of you would like to pick up some extra time please call the office and let us know.

We would like to thank all of you for your hard work and continued safe work habits, and remember each of you have **STOP** work authority on every job. Our goal is for each of you to get home to your families safely.

Sincerely,

Jonathan Longnecker  
V. P. of Operations
